 - 4th ASSOCHAM Conference on 'Safe Road – Safe Life', Delhi
 - National Conference on Road Safety(HOAI), Delhi
- And many more

TRAX Decade of Road Safety

TRAX Advocacy through Media

About TRAX

TRAX - A Road Safety NGO, has completed more than a decade of efforts on Road Safety and also well known for its contribution in the field of Road Safety. All the interventions of TRAX have been derived from 'Decade of Action for Road Safety' five pillars by World Health Organization such as:

- Pillar-1 Road Safety Management
- Pillar-2 Safe Road Infrastructure
- Pillar-3 Safe Vehicles
- Pillar-4 Road User Behaviour and
- Pillar-5 Post Crash Care.

TRAX is a specialized Road Safety NGO with Psychological & Innovative approach to the Road Safety cause. We are working closely with different stakeholders in different States of India. We are well connected and member of International organizations like The Global Alliance of NGOs for Road Safety, Three Star Coalition and IRF- India Chapter.

TRAX also supports UN Sustainable Development My World 2030 Program.

Our Mission

Reduced Road Crash Injuries and Accident Mortality rate.

Our Vision

Safer Roads- Safe Road Users

Message from President

“Your Level of Success is only pre-determined by your level of effort. Be Sure!”-Anonymous

In India Road Safety is spreading its wings and TRAX has been witnessing the same for last many years. The new policies have been introduced by the Central and State Governments to strengthen the Road Safety in India. TRAX has also submitted several recommendations under all Road Safety Pillars in context of India.

The last year was full of challenges and opportunities for the Team, where all the Team Members have played so well together and worked towards the solutions for big results. First of all, I am thankful to all the Stakeholders especially the Department of Transport, Department of Education -Government of Haryana for their great support for the long year Campaign and active Participation. We are also thankful to the Transport Department, Uttar Pradesh, Gujarat, Punjab and Traffic Police Department of Gautam Buddha Nagar, Chennai and Kolkata Police.

I, thank on behalf of Team TRAX to our CSR associates MG Motor India Pvt. Ltd., ICICI Lombard General Insurance Company Ltd., Eicher Group Foundation, Universal Sompco General Insurance Co. Ltd. and all for their support and belief to make the campaigns more meaningful and Sustainable.

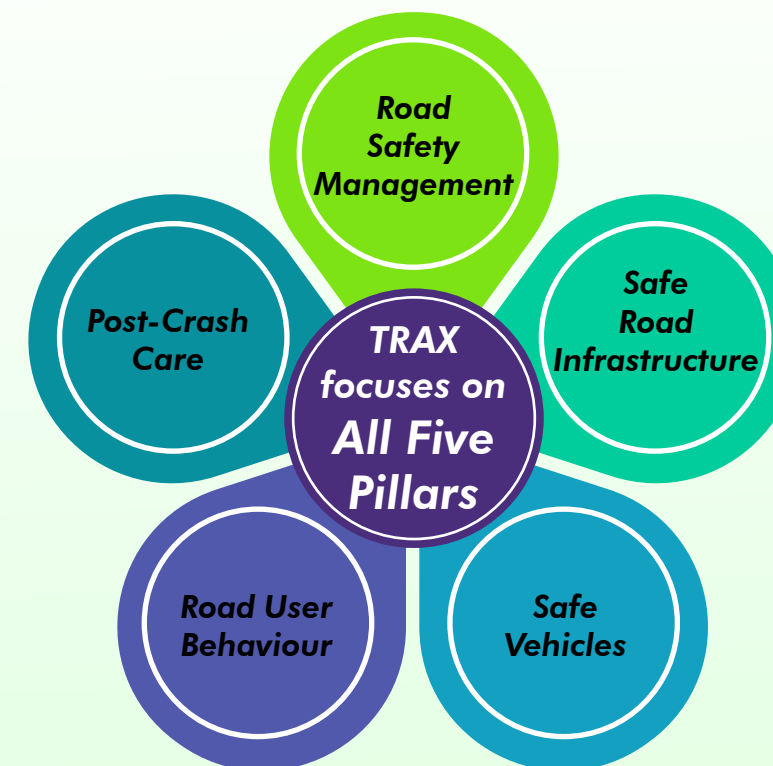

I am also grateful to our International allies The Global Alliance of NGOs for Road Safety, Gateway Associates, U.K. and iRap (International Road Assessment Program)-Star Rating for School.

Last but not the least, I urge for the Implementation of the Road Safety policies of Central and State Governments. I also urge the corporate world to be a role model for Road Safety through their Advertising pattern as many are practicing and helping to spread Road Safety across India. As a Communicator it is most important to enforce the Rule to him/herself first to be a Role model either it's a Police Personnel, Politician or even NGO.

Road Safety is Our Responsibility.

Jai Hind!

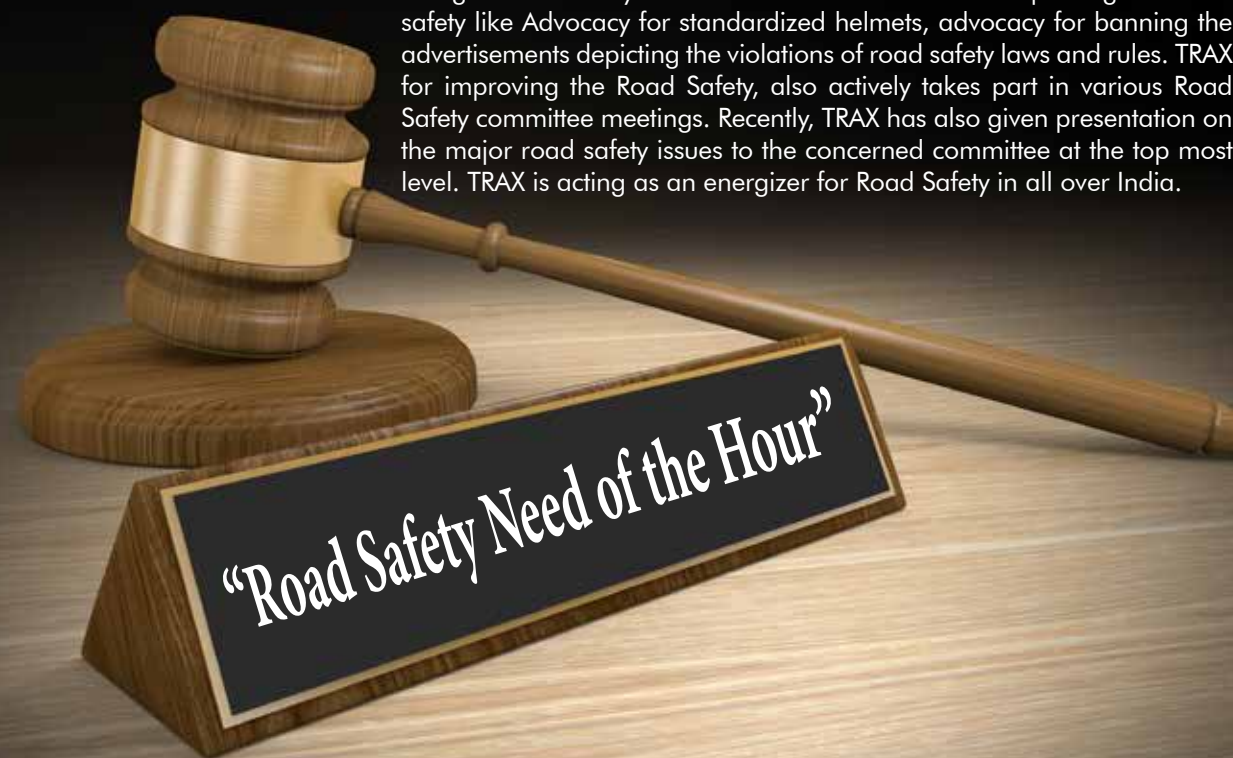

Mr. Anurag Kulshrestha,
President TRAX S. Society
Road Safety NGO

TRAX's INTERVENTIONS: Under Different Pillars

Pillar (1): Road Safety Management

TRAX mostly works engaging the stakeholders, the concerned departments on Road safety and the Lead Agency on Road Safety. TRAX has been doing the advocacy for the various issues on for improving the road safety like Advocacy for standardized helmets, advocacy for banning the advertisements depicting the violations of road safety laws and rules. TRAX for improving the Road Safety, also actively takes part in various Road Safety committee meetings. Recently, TRAX has also given presentation on the major road safety issues to the concerned committee at the top most level. TRAX is acting as an energizer for Road Safety in all over India.

Pillar (2): Safe Road Infrastructure

• 180 Degree Visibility

Seeing and being seen are fundamental prerequisites for the safety of all road users. Inadequate visibility is an important factor that influences the risk of a road crash among all types of road user. Team TRAX with concerned authorities took up the issue like SHO – I P State, Engineer – in – Chief, PWD to resolve the issues. After repeated follow ups TRAX got success to bring down length of plantation on divider in accordance to IRC code. TRAX have been advocating for improving visibility especially at intersections.

• Safe School Zone

TRAX is actively advocating for Safe School Zone from last 2 years in Delhi, Gurugram and Faridabad. Under ongoing Project "Road Safety and Juniors" an initiative by Government of Haryana, MG Motors & TRAX, we are converting the selected School Zones to Safe School Zone, by iRAP SR4S on the basis of the recommendations. TRAX has converted Government Boys Sr. Secondary School, Gurugram into Safe School Zone. For the same, TRAX has also started working for the schools of Faridabad.

Audit to establish safe school zone : By iRap SR4S & TRAX

Team found many infrastructure discrepancies like Zebra Crossing not Present, Footpath Encroached by Vendors, No Traffic Claiming Devices, No school warning sign ages etc. around Government Senior Secondary School Civil Lines Gurugram. These changes were suggested by iRAP SR4S star rating for school experts in their report for developing safer road environment around school for the safety of school Children.

Impact of Key Infrastructure Changes

After developing fencing at the edge of footpath and redesigning the side walk at the passenger side, the encroachment by local Vendors has been removed and children can use the path now. Government Boys senior Secondary school Converted from two star rating into 3 star with 16.5 score, in only 10 days during Road Safety week with the support of the Government and other stakeholders. The Process is still in continuation to provide our students safe crossings.

Pillar (3): Safe Vehicles

• Safe Riding Initiative

Dedicated To Safety of Two Wheeler Riders and Pillion Riders

TRAX and Central Road Research Institute Jointly organized two days conference on "Safe Riding Initiative" under the auspices of Ministry of Road Transport and Highways dedicated for the safety of Motorized Two Wheeler Riders and Pillion Riders on April 12-13, 2018.

The conference was attended by about 150 delegates from different regions of the country and witness the participation of 20 NGOs from 15 states and in addition, foreign delegates form United Kingdom, Bangladesh, Malaysia, Iran, Australia, Japan and Nepal have attended the conference and given their expert view on the subject. Highlighted Points in the conference focused on:-

- *Honorable Prime Minister of the country shall be made the Brand Ambassador to address road safety and hence shall be requested to assume the position of Chairman of National Road Safety Program for issuing policy decisions.*
- *Advocating for Maintenance of Roads Especially Potholes*
- *Scientific Design of Motorized Two Wheelers*
- *To Promote use of standardized Helmets*
- *Helmet usage for all ages*
- *Advertising Policy and Role of the Communicators*

Pillar (4): Road User Behaviour

1. MCRP (Media Content Regulation Program)

To promote 'Correct Road Traffic Behaviour' on roads it is mandatory that TV Commercials from all Industries including automobile industry should be made responsible in promoting 'Safety Aspect' amongst road users. Advertisements must showcase 'Safe Driving Behaviour' rather than depicting Negligent/Dangerous Driving and over speeding with a 'FUN' element. TRAX have been working on the issue since 2015 and the fight still continues. Initially TRAX faced many hurdles to present the idea of imposing a Ban on TV Commercials, Scenes in Movies & TV Serials and raised the road safety issue across India as a major safety concern with Ministry of Road Transport and Highways-Government of India, Road Safety Committee-Supreme Court of India, Advertising Standard Committee, Council of India, Censor Board, SIAM and Other stakeholders. We organized 'Pehal' Advocacy Seminar held at 'Press Club', Luck now with Media on 'Role of Media' in promotion of Road Safety and Allied Issues' where U.P. Transport Commissioner: Mr. K Ravindra Naik has already issued a notice to ban such content. Later the issue has been discussed at several platforms.

Advocacy Impact:

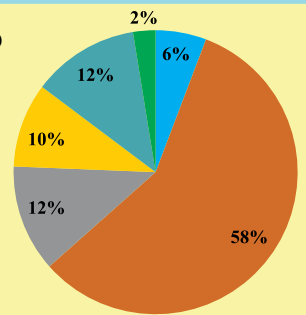

Through its continuous intervention, TRAX has been instrumental in approaching Supreme Court committee on Road Safety. The Honorable committee has taken up the issue with concerned stakeholders.

Government of Uttar Pradesh already banned the exhibition of such TV commercials which include negligent driving, rash driving, stunts, driving without helmet and seat belt.

Finding by TRAX (Ref. report by TRAX for MCRP)

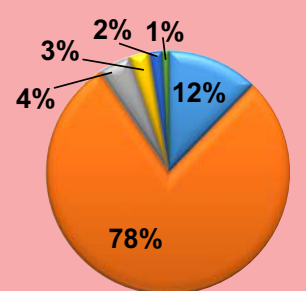

Percentage of participant who practice stunt scene learnt from movie & advertisement

■ up to 15	■ 35 -45
■ 15 -25	■ 45 -55
■ 25 -35	■ 55-65

Opinion of Participant who do not want to ban stunt scenes in Movies in %

■ up to 15	■ 35 -45

■ 25 -35	■ 55-65

2. Helmet India Advocacy & Awareness

- 👉 Safe Road User Initiative
- 👉 National Bike Rider on a Mission
- 👉 Ride to Safety

Safe Road Users Initiative

Eicher Group Foundation and TRAX have come together for the project "Safe Road Users Initiative" With support of Kolkata Traffic Department, with an aim to encourage young people to use the Standardized Helmets. As part of global and local social welfare commitments to support regional improvement of social welfare activities on a group-wide basis, we have come together to raise awareness on the importance of standardized helmets. During Kolkata Road Safety week, from 11th to 17th March,2019, Kolkata Police with TRAX carried out the activity under "Safe Road User Initiative" , wherein team targeted defaulter MTW Riders and Pillion Riders who were violating Helmet rules, and Distributed standardized Helmet to them. The Project is continued.

National Bike Rider on a Mission

TRAX's Volunteer- Ms. Pooja Yadav , Solo biker took an initiated for 15 Days Motorcycle Ride from Sunday 19th November 2018 onwards , for the 'MISSION – HELMET' across seven states. She got the support of the family, Police officers, Transport Officers, and NGOs across the country ever since of the Ride and completed a 10,000 km Motorcycle Journey to 15 stated and 42 Cities across India .During her mission she had ensure that every Rider should wear ISI marked Standardized Helmets especially women Riders and Pillion Riders. Along the way, she met decision makers including enforcement agencies and gathered commitments from the officials like Principal Secretary, Transport Commissioner, and Senior Superintendent of Police, Additional Director General of Police, District Magistrate and Politicians. Initiative was connected with NGOs and got overwhelming support by NGOs and number of Biker's Group's across India and Generated Plenty of media attention for the issue.

Ride to Safety

ICICI Lombard General Insurance Co. Ltd. initiated a campaign 'Ride To Safety Initiative'. We Congratulate ICICI Lombard and Entire Ride to Safety Team for creating a Guinness World Record made with 4999 Children wearing standardized Helmets on January 2019. TRAX is proud to be part of Ride to Safety Campaign from it's inception. TRAX has also been shouldering the responsibility of it's execution in different cities in India.

3. Youth Engagement Program for Road Safety

a) Road Safety Rangers

Sompo Japan Nipponkoa Welfare Foundation and Universal Sompo General Insurance Company Ltd. with TRAX has come together for the project "Road Safety Rangers" which aims to impart and invoke local resources to be the Social Ambassadors of extending knowledge, training, research and group activities pertaining to the cause of 'Road Safety' among their social circle and fellow students.

b) A.F.S. Surveyed Pedestrian facilities

Team TRAX and Volunteers from A.F.S. surveyed the Pedestrian facilities at Paharganj, New Delhi. During this survey volunteers have observed the problem faced by the students especially due to lack of proper facilities near their school. Senior citizens also shared their problems as pedestrians. Volunteers had interacted with Traffic Cops also.

c) Youth Road Safety Program

Youth Road Safety Program (Capacity Building Program and Internships on Road Safety) in 2018

- i. Students from IIT- Delhi
- ii. Students from ARF- Delhi
- iii. Students of JDS University- Japan

4. Global Week of Action

Global week of Action was observed on 25th September 2018, with the Goal- 'Good Health and Well Being' and 'Sustainable Cities and Communities' .A Road Safety Track in Bal Bharati School, Pusa Road, New Delhi was developed under 'Safer Road Safer India Campaign with Youth Services America. The track is especially designed focusing the behavior pattern of children under age of 10. A special thanks to Central Road Research Institute for their support.

5. World Day of Remembrance for Road Traffic Victim, November 2018

TRAX has been observing WDR- World Day of Remembrance for Road Crash Victims from last six years in different State and with Transport Department like Punjab , Delhi and Uttar Pradesh. TRAX's Volunteer –Ms. Pooja Yadav , women Bike rider Started her Journey on World Day of Remembrance for 15 days across all 15 states and 42 cities for the 'MISSION-HELMET'. During her mission she ensured that every Rider should wear ISI marked Standardized Helmet.

6. Road Safety and Juniors Program

Launch of Road Safety and Juniors Program by MG Motor , Government of Haryana & TRAX.

The program entitled 'Road Safety and Juniors' focuses on spreading road safety awareness among school students to make Indian Roads safe and secure for them and their loved ones. Supporting by senior officials and dignitaries from various Government Departments from Transport, Roads & Traffic Police attended the event held on 14th November, 2018 on Children's Day at the Senior Government Secondary School in Chakkarpur , Gurugram , Haryana . The Chief Guest were Mr.Dhanpat Singh, Honourable ACS – Transport Department, Haryana, Addressing the students on this occasion

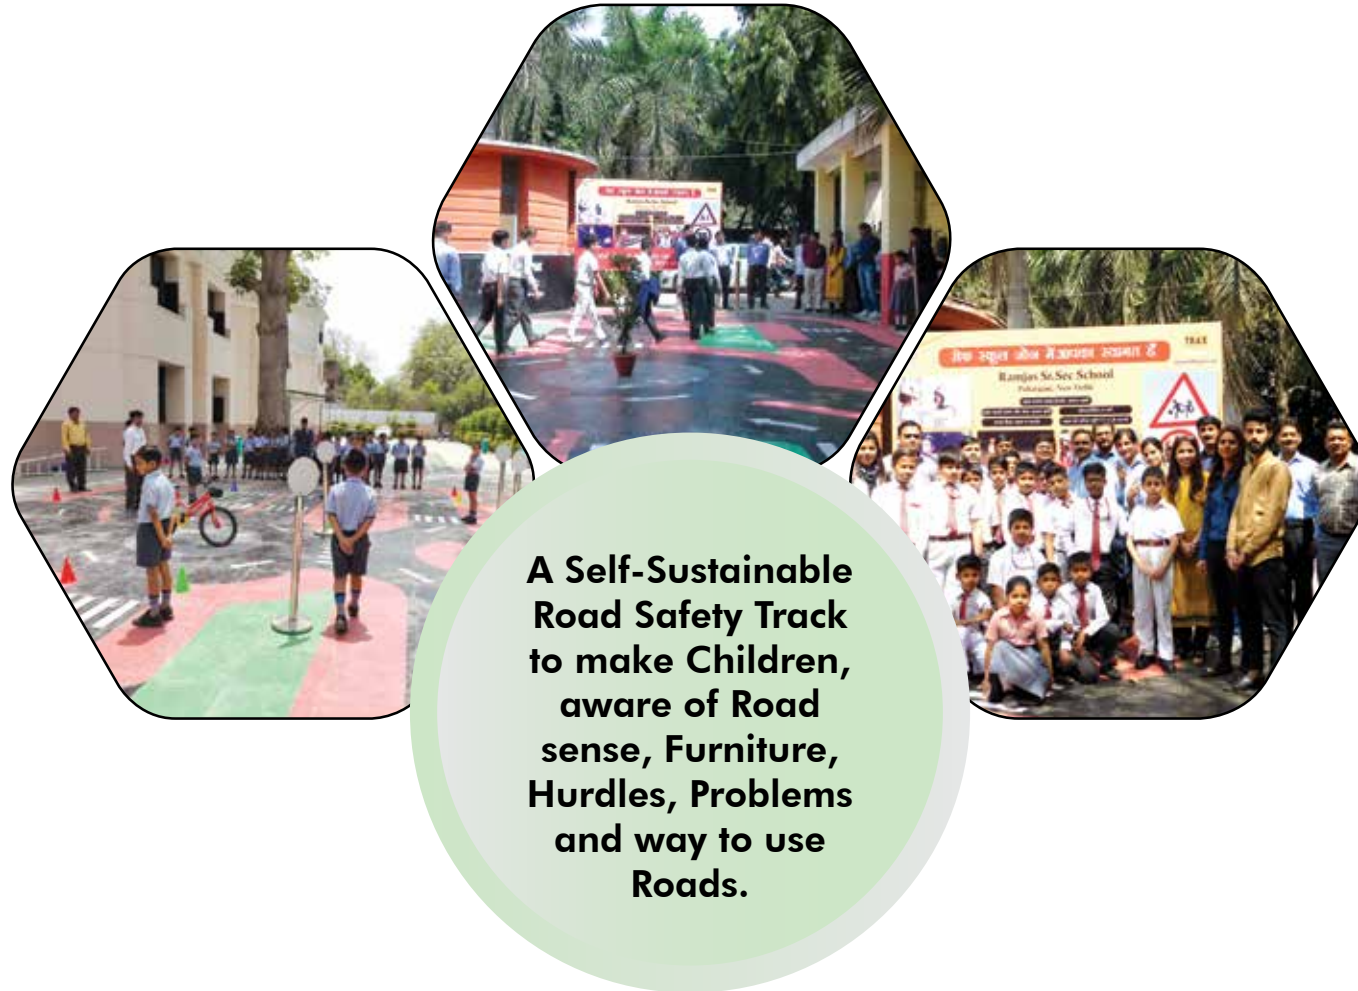

Road Safety and Juniors is a long year Project which is continued and several Activities like:-

- Teacher's Training on Road Safety and Role of bystanders First Respondent.
- Safe School Zone
- School Based Activities
- Driver's Training

7. Development of School Road Safety Track

A Self-Sustainable Road Safety Track to make Children, aware of Road sense, Furniture, Hurdles, Problems and way to use Roads.

Pillar (5): Post Crash Care

A) Awareness about Good Samaritan ,Training on Role of Bystanders and First Respondent

Under the ongoing Project 'Road Safety & Juniors Initiative' First Respondent Training by Specialist Doctor / Paramedic from AIIMS (All India Institute of Medical Sciences). Approx. 300 Teachers have been Trained .

B) Advocating for Pillar 5 Post Crash Care with the Concerned Authorities & Stakeholders

TRAX Advocacy through Media

महिलाओं के लिए हेलमेट की आवश्यकता को लेकर जागरूकता अभियान पर निकली पूजा यादव जोश के साथ लोगों से कर रही हैं हेलमेट की अपील

Noida remembers victims of traffic accidents

Woman biker shows the road to safety

Three years ago after seeing her interest in motorcycles, Noida, Ms. Yadav says she is confident of her riding skills. "I got the idea for this ride six months ago and discussed it with my family, who were initially apprehensive. However, my husband's support and encouragement on Tuesday night, Ms. Yadav's expedition commenced in Noida on November 23, and she has so far covered Delhi, Punjab, Rajasthan, Gujarat, Madhya Pradesh, and Telangana before entering Andhra Pradesh. Her expedition is being funded by TRAX, a Delhi based NGO.

Ms. Yadav says her family is overwhelmed with the support she has been getting from the police and the motorcycle club across the country ever since the start of her solo ride. Ms. Yadav rides about 300 km every day and at every stop, interacts with members of NGOs and motorcycle clubs. She also meets police officials in the cities she visits. In Visakhapatnam, she met Mr. Chaitanya S. Prabhakar and his team. Ms. Yadav's next stop will be in Bhubaneswar, and she plans to reach Delhi by December 30 after covering Odisha, West Bengal and Jharkhand.

चालकों की गलती सड़क हादसों की मुख्य वजह

दिल्ली में संपन्न सम्मेलन में सामने आए तथ्य

नई दिल्ली, 18 अप्रैल (एजेंसी)। सड़क परिवहन और राजमार्ग मंत्रालय (मोर्थ) की हाल ही की एक रिपोर्ट के अनुसार वर्ष 2016 के दौरान देश में 84 प्रतिशत सड़क दुर्घटनाओं में 80 प्रतिशत लोगों की मौत हुईं जबकि 84 प्रतिशत चखी हुए। रिपोर्ट के अनुसार इन हादसों के पीछे चालकों की गलती को मुख्य कारक माना गया है।

सड़क परिवहन और राजमार्ग मंत्रालय (मोर्थ) के तत्वावधान में सीएसआईआर-सीआरआरआई (केन्द्रीय सड़क अनुसंधान संस्थान), नई दिल्ली और ट्रेक्स एस सोसायटी (रोड सेफ्टी एनजीओ) के सहयोग के अंतर्गत सुरक्षित यात्रा पहल पर दो-दिवसीय अंतर्राष्ट्रीय सम्मेलन का यह बात सामने आई है। सम्मेलन दिल्ली में संपन्न हो गया। सम्मेलन का उद्देश्य दोपहिया वाहन चालकों के लिए मौत और चोटों को कम करने के लिए प्रयास करना है। सम्मेलन में बताया गया कि वर्ष 2005 के बाद से यातक दुर्घटनाओं की संख्या में लगातार वृद्धि देखी गई है तथा प्रति 100 सड़क दुर्घटनाओं में मारे गए व्यक्तियों की दृष्टि से दुर्घटनाएं गंभीर होती जा रही हैं, जो 2015 में 29.1 से बढ़कर 2016 में 31.4 हो गईं। इससे भी महत्वपूर्ण बात यह है कि वाहन के विभिन्न प्रकारों के बीच, 2016 में सड़क दुर्घटनाओं की कुल संख्या में दो पहिया वाहनों की सर्वाधिक हिस्सेदारी (33.8 प्रतिशत) थी।

Project Road Map of Road Safety & Juniors Initiative – Showcasing progress Achievement and way forward

ROAD SAFETY AND JUNIORS

Paving the way for a safer tomorrow.

Road Safety and Juniors

During the phase 1,2 and 3 of Road Safety and Juniors Program ,295 Teachers has been trained in Gurugram and Faridabad.

01

Gurugram

02

Faridabad.

Phase 4 : Developing Safe School Zone

4th phase of program implies to develop Safe School Zone in selected four most vulnerable Schools in Gurugram and Faridabad.

Road Audit at Government Boys Senior Secondary School Civil Lines Gurugram -Haryana

Recommendation by iRAP Report,

The recommendation as per iRAP report, intervention in front of the Government Boys Senior Secondary School Civil Lines Gurugram for the Safety of School Children are Following:

- Speed Calming Devices
- Speed Humps
- Marked Pedestrian Crossings
- Bollards to Restrict Vehicles
- Speed limit Boards
